COLOR: Amber

## Advisory for the Low Pressure Area located in the East Central Bay of Bengal

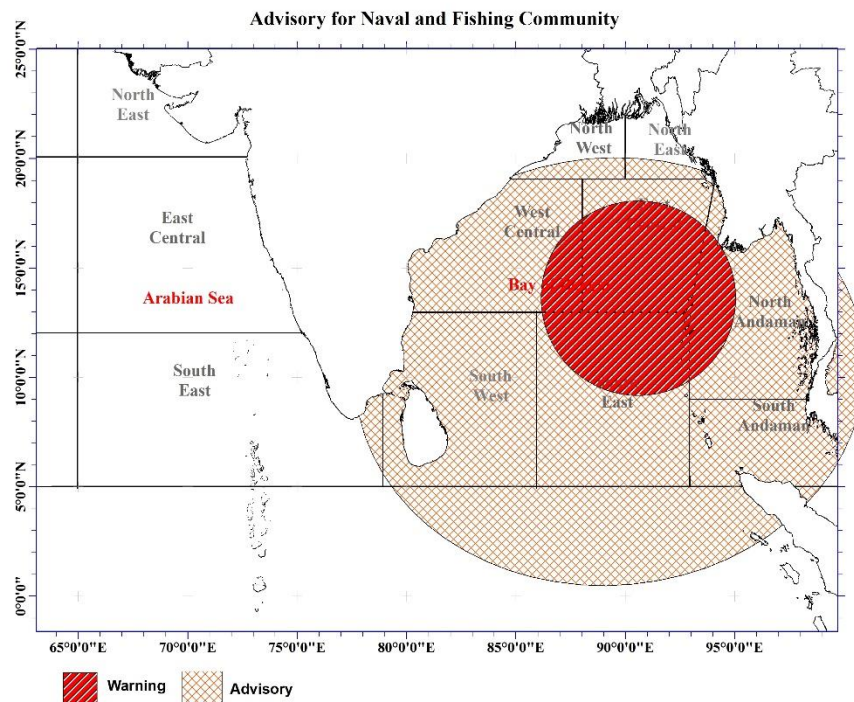

Issued by the Natural Hazards Early Warning Centre

Issued at 03.00 p.m 22 May 2021

### For the deep and shallow sea areas around the island

#### PLEASE BE AWARE!

- The low-pressure area located in East Central Bay of Bengal is likely to intensify into a depression around 23<sup>rd</sup>. The system is very likely to intensify into a cyclonic storm by 24<sup>th</sup>. It is very likely to move northwestwards and reach near west Bengal coasts around 26<sup>th</sup> May.
- As such, sudden roughness of the sea associated with strong winds (**50-60 kmph, up to 70-80 kmph** gusty wind at times) during thundershowers are expected over the North Andaman sea and adjoining east central Bay of Bengal and deep sea area of southwest Bay of Bengal during next few days.
- Under the influence of the system, possibility for heavy showers or thundershowers and sudden roughness, associated with sudden increase of wind speed up to **50-60 kmph** is high in deep and shallow sea areas around the island during next few days.
